

Immunizations NOW

Covid Bivalent Vaccine

Annual Flu shot

Where?

Kaseman Clinic Saturdays from 10-1PM at RUC
For an appointment call: 301-917-6800

Why?

Omicron variants have caused an increasing number of people in our area to be sick from Covid-19. This vaccine has both the initial covid vaccine and the new vaccine includes protection from Omicron variant.

The vaccine to protect against severe Influenza (the Flu) is available now. After two milder years when everyone wore masks and were not socializing, we had a lower number of cases of influenza. This year the number of cases of influenza are much greater. Seniors need the high dose version which has 4 flu strains.

These vaccines are available at most CVS and Walgreens, other pharmacies and many grocery stores. They are also available at most doctors' offices, some walk in and some by appointment.

Please get vaccinated.
